BMO Skidplate Kits

Blue Mountain Skidplates are cut from non-woven, 3.5 oz., Kevlar® Felt. Our kits are packaged in pairs and come with the most detailed instructions in the industry.

We recommend different epoxy recipes for Royalex® and Polyethylene boats. For Royalex® we use MAS Epoxies Flag Resin and hardener. For Polyethylene we use a combined mixture of the MAS epoxy listed above and West System, G/Flex Epoxy. The skidplate kit instructions provide ingredient and mixing details.

We cannot ship epoxy via US Postal Service.

BMO Standard

For canoes with finer stems. Less than 2" across.

\$16.95

Whitewater Mini

For medium diameter stems.
About 6" across -- like Legend 16.

\$19.95

Whitewater Big Ass

For very blunt stems.
All-out whitewater canoes.

\$18.95

Sin Cover

For finer stems with extensive wear.

\$20.95

Skidplate Epoxy kit for Royalex® boats.

With small measuring / mixing cups, mixing sticks, and laytex gloves.

\$49.95

Skidplate Epoxy kit for Polyethylene boats.

With small measuring / mixing cups, mixing sticks, and laytex gloves.

\$67.90
