

'SMALL' CANOE & KAYAK TRAILERS

CONFIGURATIONS:

Two and four boat models available. The number of boats indicates the canoe capacity of the trailer (the number of rung spaces). With the standard rung configuration, kayak capacity is normally double this number.

OPTIONS:

- 1 7/8" ball coupler (no charge)
- Bungee cords
- 20" stacker posts; without this the top rung is flat and uninterrupted over the full trailer width,
- Galvanized wheels
- Increase box length and tree spread to 8 foot

STANDARD FEATURES:

- Heavy duty steel frame and expanded steel cargo box. The 4 boat trailer weighs approximately 450 lbs.; This facilitates towing with smaller vehicles.
- Independent, rubber torsion suspension provides a smooth, quiet ride and lower frame height.
- Easily lubed hubs -- lubricate all bearings without disassembly.
- Axle positioned for a stable ride and to prevent flipping when not attached to a vehicle (even when climbing on back end).
- 13" tires and white spoke wheels. Spare tire and wheel are standard. Sturdy metal fenders with closed backs.
- 2" ball coupler.
- Flip-up 6" jack wheel.
- Rung protection stripping made from durable, non-marring rubber. Protective end caps and two tie-down points on each rung.
- Window in rear of cargo box for long kayak paddles.
- LED tail/side marker lights that are mounted high and protected by steel channel. LED front marker lights. Lighted license plate holder. 4-wire plug (flat style).
- Color: Gloss black.
- Designed by a company that uses them daily: us.
- Registered with National Highway Traffic Safety Administration.

Our 'Standard' Canoe and Kayak Trailers are also available. They have a 4, 6, 8, or 10 canoe capacity and share most of the standard features listed here but are larger and heavier.

DIMENSIONS AND RATINGS:

- Width of rungs36"
- Vertical clearance between rungs24"
- Overall length 16'- 7"
- Overall width6'- 6"
- Overall height 2-boat 2'- 6", 4-boat 4'- 7½"
- G.V.W.R. 2000 lb.

CARGO BOX:

- Width4'- 0"
- Length6'- 0" (distance between trees)
- Depth 16" (cooler compatible)
- Volume 32 cubic feet
- Cargo box is constructed with heavy expanded metal -- no puddles.
