

'STANDARD' CANOE & KAYAK TRAILERS

CONFIGURATIONS:

4, 6, 8, and 10 boat models are available. The number of boats indicates the canoe capacity of the trailer (the number of rung spaces). With standard rung dimensions and spacing, the kayak capacity is normally double to triple this number .

OPTIONS:

- 1 7/8" ball couplerno charge
- Bungee cords
- Galvanized wheels

STANDARD FEATURES:

- Heavy duty steel frame and expanded steel cargo box. The 8-boat trailer weighs approximately 800 lbs.
- Independent, rubber torsion suspension provides a smooth, quiet ride and lower frame height.
- Easily lubed hubs -- lubricate all bearings without disassembly.
- Axle positioned for a stable ride and to prevent flipping when not attached to a vehicle (even when climbing on rear steps).
- 13" tires and white spoke wheels. Spare tire and wheel are standard. Sturdy metal fenders with closed backs.
- 2" ball coupler. Flip-up 6" jack wheel.
- Steps on front and rear trees.
- Rung protection stripping made from durable, non-marring rubber. Protective end caps and two tie-down points on each rung.
- LED tail/side marker lights that are mounted high and protected by steel channel. LED front marker lights. Lighted license plate holder. 4-wire plug (flat style).
- Color: Gloss black.
- Designed by a company that uses them daily: us.
- Registered with National Highway Traffic Safety Administration.

Our 'Small' Canoe and Kayak Trailers are also available with 2 or 4 canoe capacity. Lighter to tow, with most of the standard features listed here.
